

Forklift Electrical Parts

Forklift Electrical Parts - Lift trucks can be particularly labeled for use in hazardous places. A labeled forklift indicates the design has met the minimum standards of ANSI/UL 558 intended for engine powered trucks or ANSI/UL 583 intended for electric forklifts for the type of label put.

The application for labels utilized for lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Consult your local insurance provider and Fire Marshall for further info about the permitted uses of industrial powered lift trucks in your application.

If the particular forklift satisfies the outlined criteria, labels could be placed. A labeled forklift will show the type of designation placed on the nameplate and will have a correctly corresponding label attached.
